

New evening and weekend GP services

You can now access primary care appointments in the evening and on Saturday mornings if you are registered at a Practice in the North Sedgemoor area

Patients who need to consult with a clinician in the evening or at the weekend can enquire about appointment availability by talking to the receptionist at your registered practice during normal opening hours. Your appointment will be with a Practice in the North Sedgemoor area and may not be your registered Practice

If you or your family members become ill overnight or at the weekend and need medical advice outside of opening times, you should continue to call NHS 111.
